**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of group I Figs 1 and 2 in the reply filed on December 28, 2005 is acknowledged.
2. Claims 3, 4, and 11-14 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected allowable, there being no allowable generic or linking claim.

***Drawings***

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the torque limiter must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 3682

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

4. Claims 6 and 16 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the power transmission, does not reasonably provide enablement for a torque limiter. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims.

The specification fails to disclose how the claimed invention would work with a torque limiter. It also fails to provide the elements of the torque limiter and how they would work with the described power transmission in order to limit the torque. The specification describes several torque limiters, but does not teach the use of any of those listed with the power transmission.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 5, 7, 8, 15, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Nakano et al (US 6,273,230).

Nakano et al disclose a power transmission comprising: a first rotating member (34,35) driven by an external drive source (41); an electromagnetic solenoid (33) provided on said first rotating member (see Fig 1); a second rotating member (unnumbered, see Fig 1) connected to a main shaft (39) of a rotary apparatus (compressor); and a mechanism (38) for engaging a plunger (37) of said electromagnetic solenoid to and for disengaging said plunger from said second rotating member (col. 7 line 57 – col. 8 line 30).

Re claims 5 and 15, comprising a guide mechanism (35b), wherein said guide mechanism for guiding said plunger (37) of said electromagnetic solenoid along said first rotating member is provided between said plunger and said first rotating member (see Fig 1).

Re claims 7 and 17, said rotary apparatus is a compressor for use in an air conditioning system for vehicles (col. 1 lines 5-15).

### ***Allowable Subject Matter***

7. Claims 2, 9, and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
